

Thank you for your custom app order!

Your app will be built around the way you work. Here is what happens next.

NEXT STEPS

1

I'll message you within 24 hours

Through Etsy messages, with a short questionnaire about what you need, your data and your deadline. Already sent me the details? Then I'll go straight to step 2.

2

You get a quote

A clear price and delivery date, with exactly what is included. Nothing is built until you accept it.

3

Your payment counts toward the total

What you paid for this listing is deducted from the final price. If we can't agree on a quote, or your idea isn't possible, I'll refund it in full.

4

You receive your app

Through a private Etsy listing: one file that works on your PC, Mac or tablet, without internet. Optional installer for Windows and Mac. One round of adjustments included.

To speed things up: have your logo (if you want it), examples or screenshots of how you work today, and any Excel or CSV files you'd like to bring in.
